Contact person details

Name [contact_name]

E-mail [contact_email]

Phone number [contact_phone_number]

Will you also be the site investigator?

☐ Yes
☐ No

Investigator details

Please enter the name and contact details of the site investigator

Name _____

E-mail _____

Phone number _____

Please enter these additional investigator details

Designation _____

Specialization _____

MRC number _____

Is the investigator trained in International Council
for Harmonisation, Guideline for Good Clinical
Practice (ICH GCP)?

☐ Yes
☐ No

Ethics committee details

Does your hospital have an ethics committee registered
with CDSCO?

☐ Yes
☐ No

Please enter the ethics committee registration number

Information about initial trauma care

Can you please explain how initial trauma care is organised at your hospital?

(How do the patients typically arrive? Who is involved initially? What is the role of the casualty medical officers? What happens when additional expertise is needed? Are physicians organised in units? How big are those units?)

How many trauma patients aged 15 years or older are admitted per day, excluding patients with isolated limb injuries and those who are admitted directly to the ward?

We need to include at least 12 patients per month, do you see any problems with including that many patients at your site?

☐ Yes
☐ No

Can you please elaborate on those problems?

All hospitals in this trial will receive the intervention. The intervention is that we will train approximately 10 physicians providing initial trauma care in ATLS in your hospital. Who do you think we should train to maximise the effect?

(Surgical residents? Emergency medicine residents? Casualty medical officers? Someone else??)

If we would like to visit your hospital to observe trauma care delivery in the emergency department and talk to providers, how can that be arranged?

The time point when the training will be implemented will be randomised, but there will be a minimum of three months between the start of the data collection and the training. The training will happen during a one month long "transition period". How long notice do you need to plan the participation of the physicians from your hospital?
